24. Dr. Brosnan and Dr. de Waal have eventually **found** in

25. What can we infer from the last paragraph?

反复 + 倾向

考研英语真题 2005年text1 第一段

Everybody loves a fat pay rise. Yet pleasure at your own can vanish if you learn that a colleague has been given a bigger one. Indeed, if he has a reputation for slacking, you might even be outraged. Such behaviour is regarded as "all too human," with the underlying assumption that other animals would not be capable of this finely developed sense of grievance. But a study by Sarah Brosnan and Frans de Waal of Emory University in Atlanta, Georgia, which has just been published in Nature, suggests that it is all too monkey, as well.

考研英语真题 2005年text1 第四段

In the world of capuchins, grapes are luxury goods (and much preferable to cucumbers). So when one monkey was handed a grape in exchange for her token, the second was reluctant to hand hers over for a mere piece of cucumber. And if one received a grape without having to provide her token in exchange at all, the other either tossed her own token at the researcher or out of the chamber, or refused to accept the slice of cucumber. Indeed, the mere presence of a grape in the other chamber (without an actual monkey to eat it) was enough to induce resentment in a female capuchin. Indeed, the mere presence of a grape in the other chamber (without an actual monkey to eat it) was enough to induce resentment in a female capuchin.

考研英语真题 2005年text1 第四段

卷尾猴 葡萄 奢侈的 商品;物品 更好的,更受偏爱的

黄瓜 交给 作为...交换 代币

不乐意的;勉强的 仅仅 片/块 黄瓜

收到 提供 代币

V. 投掷;扔 代币 隔间 ②

V. 拒绝 确实 仅仅 n. 出现

隔间 实际的 引起反感

n. 反感;憎恨

either A or B : A或B 结构相似;功能一致

考研英语真题 2005年text1 第五段

实验结论:

表明;暗示;建议

引导

The researchers suggest that capuchin monkeys, like humans, are guided by social emotions. In the wild, they are a co-operative, group-living species. Such co-operation is likely to be stable only when each animal feels it is not being cheated. Feelings of righteous indignation, it seems, are not the preserve of people alone. Refusing a lesser reward completely makes these feelings abundantly clear to other members of the group. However, whether such a sense of fairness evolved independently in capuchins and humans, or whether it stems from the common ancestor that the species had 35 million years ago, is, as yet, an unanswered question.

考研英语真题 2005年text1 第2题

03 ~ 2012 造反+题干

Everybody loves a fat pay rise. Yet pleasure at your own can vanish if you learn that a colleague has been given a bigger one. Indeed, if he has a reputation for slacking, you might even be outraged. Such behaviour is regarded as “all too human,” with the underlying assumption that other animals would not be capable of this finely developed sense of grievance. But a study by Sarah Brosnan and Frans de Waal of Emory University in Atlanta, Georgia, which has just been published in Nature, suggests that it is all too monkey, as well.

22. The statement “it is all too monkey” (Last line, Paragraph 1) implies that __.

- ☒ [A] monkeys are also outraged by slack rivals
☒ [B] resenting unfairness is also monkeys' nature
☒ [C] monkeys, like humans, tend to be jealous of each other
☒ [D] no animals other than monkeys can develop such emotions

考研英语真题 2005年text1 第3题

The researchers studied the behaviour of female brown capuchin monkeys. They look cute. They are good-natured, co-operative creatures, and they share their food readily. Above all, like their female human counterparts, they tend to pay much closer attention to the value of "goods and services" than males.

23. Female capuchin monkeys were chosen for the research most probably because they are _____.

- [A] more inclined to weigh what they get
- [B] attentive to researchers' instructions
- [C] nice in both appearance and temperament
- [D] more generous than their male companions

考研英语真题 2005年text1 第4题

The researchers suggest that capuchin monkeys, like humans, are guided by social emotions. In the wild, they are a co-operative, group-living species. Such co-operation is likely to be stable only when each animal feels it is not being cheated. Feelings of righteous indignation, it seems, are not the preserve of people alone. Refusing a lesser reward completely makes these feelings abundantly clear to other members of the group.

24. Dr. Brosnan and Dr. de Waal have eventually found in their study that the monkeys _____.

- ☒ [A] prefer grapes to cucumbers
- ☒ [B] can be taught to exchange things
- ☒ [C] will not be co-operative if feeling cheated
- ☒ [D] are unhappy when separated from others

实验结论:

investigation

结论: show / suggest / reveal /
conclude...

考研英语真题 2005年text1 第5题

The researchers suggest that capuchin monkeys, like humans, are guided by social emotions. In the wild, they are a co-operative, group-living species. Such co-operation is likely to be stable only when each animal feels it is not being cheated. Feelings of righteous indignation, it seems, are not the preserve of people alone. Refusing a lesser reward completely makes these feelings abundantly clear to other members of the group. However, whether such a sense of fairness evolved independently in capuchins and humans, or whether it stems from the common ancestor that the species had 35 million years ago, is, as yet, an unanswered question.

25. What can we infer from the last paragraph?

☒ [A] Monkeys can be trained to develop social emotions.

☒ [B] Human indignation evolved from an uncertain source.

☒ [C] Animals usually show their feelings openly as humans do.

☒ [D] Cooperation among monkeys remains stable only in the wild

考研英语真题 2005年text1 第5题

However, whether such a sense of fairness evolved independently in capuchins and humans, or whether it stems from the common ancestor that the species had 35 million years ago, is, as yet, an unanswered question.

25. What can we infer from the last paragraph?

- [A] Monkeys can be trained to develop social emotions.
- [B] Human indignation evolved from an uncertain source.
- [C] Animals usually show their feelings openly as humans do.
- [D] Cooperation among monkeys remains stable only in the wild.
