考研英语二真题 2018年text2第1段

① While fossil fuels--coal, oil, gas--still generate roughly 85 percent of the world's energy supply, it's clearer than ever that the future belongs to renewable sources such as wind and solar. The move to renewable is picking up momentum around the world: They now account for more than half of new power sources going on line.

pick up 拾起; 接人; 提高; 恢复

考研英语二真题 2018年text2第2段

Some growth stem from a commitment by governments and farsighted businesses to fund cleaner energy sources. But increasingly the story is about the plummeting prices of renewables, especially wind and solar. The cost of solar panels has dropped by 80 percent and the cost of wind turbines by close to one-third in the past eight years.

The advance is driven in part by vehicle manufacturers, who are placing big bets on battery-powered electric vehicles. Although electric cars are still a rarity on roads now, this massive investment could change the picture rapidly in coming years.

考研英语二真题 2018年text2第7段

关注进群领取笔记及考研真题

While there's a long way to go, the trend lines for renewables are spiking.

The pace of change in energy sources appears to be speeding up--perhaps just in time to have a meaningful effect in slowing climate change. What Washington does--or doesn't do--to promote alternative energy may mean less and less at a time of a global shift in thought.

nail n. 指尖; 钉子
spike n. 猛增; 飙升; 钉子

President Trump has underlined fossil fuels--especially coal--as the path to economic growth. In a recent speech in Iowa, he dismissed wind power as an unreliable energy source. But that message did not play well with many in Iowa, where wind turbines dot the fields and provide 36 percent of the state's electricity generation--and where tech giants like Microsoft are being attracted by the availability of clean energy to power their data centers.

28. It can be learned that in Iowa, ____.

- A. wind is a widely used energy source.
- ~~B. wind energy has replaced fossil fuels~~
- ~~C. tech giants are investing in clean energy~~
- ~~D. there is a shortage of clean energy supply~~

考研英语二真题2018年tex2第4题

⑤ The question “what happens when the wind doesn’t blow or the sun doesn’t shine?” has provided a quick put-down for skeptics. But a boost in the storage capacity of batteries is making their ability to keep power flowing around the clock more likely.

⑥ The advance is driven in part by vehicle manufacturers, who are placing big bets on battery-powered electric vehicles. Although electric cars are still a rarity on roads now, this massive investment could change the picture rapidly in coming years.

29. Which of the following is true about clean energy according to Paragraphs 5 & 6

A. Its application has boosted battery storage.

B. It is commonly used in car manufacturing.

C. Its continuous supply is becoming a reality.

D. Its sustainable exploitation will remain difficult.
